Dear Ehud

I went over Udi's comments. Some of them are things that were already negotiated and have to be accepted as the best we could achieve. Some are not worth asking further changes for at this stage.

Four points that Udi makes that are related to your contribution:
1. Nobody expects you to travel to Shanghai to report to the investment committee. Not once a year nor twice a year. It will be me and Alon who will do so.
2. No one expects you to sit on the boards of healthcare companies.
3. You are expected by the Chinese to give your name and reputation to our activities by carrying the title of Chairman of EBG. Even the time commitment your are expected to give "significant time" is very elusive definition.
4. We are committing to them that we will not work or represent any other entity in China in the area of healthcare investments including devices, healthIT, pharmaceuticals and biotech. I don't have a problem with that and I believe that nor should you?

Therefore, I am going to write to them that we accept their latest version and are willing to sign. I believe that if there are still any points that were not negotiated and previously accepted by us that you will want us to raise we will be able to do so during the definitive agreement.

I suggest that if you will be back in Israel before their arrival on Oct 25 at night, we should meet to discuss these issues and other issues related to our joint activities going forward.

Best Regards

Benad
